

I'm not robot

Open

```
C:\tmp>jshell -?
Usage: jshell <option>... <load-file>...
where possible options include:
--class-path <path> Specify where to find user class files
--module-path <path> Specify where to find application modules
--add-modules <module>(<module>)*
Specify modules to resolve, or all modules on the
module path if <module> is ALL-MODULE-PATHS
--enable-preview Allow code to depend on preview features of this release
--startup <file> One run replacement for the startup definitions
--no-startup Do not run the startup definitions
--feedback <mode> Specify the initial feedback mode. The mode may be
predefined (silent, concise, normal, or verbose) or
previously user-defined
```

```
C:\java\examples\cli>java -cp C:\lib\commons-cli-1.4\commons-cli-1.4.jar;dist\lib\cli.jar examples\dustin.commandline.cli

usage: Main -f <arg> [-v]
=====
HELP
=====
usage: Main
Example of Using Apache Commons CLI
-f, --file <arg> File to be processed.
-v, --verbose Print status with verbosity.
See http://marxsoftware.blogspot.com/ for further details.
C:\java\examples\cli>
```

```
Usage: checkstyle [-d] [-t] [-x] [--executeIgnoredModules] [--tabwidth=<tabwidth>]
[-c=<configurationFile>] [-c=<checkerThreadsNumber>] [-f=<format>]
[-o=<outputPath>] [-p=<propertiesFile>] [--suppressTaintInColumnNumbers]
[-m=<treeWalkerThreadsNumber>] [-e=<exclude>] [--excludeRegexp=<excludeRegexp>]... <files>...
Checkstyle verifies that the specified source code files adhere to the specified rules. By default
errors are reported to standard out in plain format. Checkstyle requires a configuration XML file
that configures the checks to apply.
<files>... One or more source files to verify
--executeIgnoredModules
Allows ignored modules to be run.
--tabwidth=<tabwidth> Sets the length of the tab character. Used only with "-s" option. Default
value is 8
-c=<configurationFile> Sets the check configuration file to use.
-C, --checker-threads-number=<checkerThreadsNumber>
(experimental) The number of checker threads (must be greater than zero)
-d, --debug Print all debug logging of CheckStyle utility
-e, --exclude=<exclude> Directory path to exclude from CheckStyle
-f=<format> Sets the output format. Valid values: xml, plain. Defaults to plain
-g, --generate-xpath-suppression
Generates to output a suppression.xml to use to suppress all violations from
user's config
-h, --help Show this help message and exit.
-j, --javadocTree Print parse tree of the Javadoc comment
-J, --treeWithJavadoc Print full Abstract Syntax Tree of the file
-o=<outputPath> Sets the output file. Defaults to stdout
-p=<propertiesFile> Loads the properties file
-s=<suppressTaintInColumnNumbers>
Print xpath suppressions at the file's line and column position. Argument is
the line and column number (separated by a : ) in the file that the
suppression should be generated for
-t, --tree Print Abstract Syntax Tree(AST) of the file
-T, --treeWithComments Print Abstract Syntax Tree(AST) of the file including comments
-V, --version Print version information and exit.
-W, --tree-walker-threads-number=<treeWalkerThreadsNumber>
(experimental) The number of TreeWalker threads (must be greater than zero)
-x, --exclude-regexp=<excludeRegexp>
Regular expression of directory to exclude from CheckStyle
```

Org.apache.commons.cli.options.jar download. Org.apache.commons.cli.options.jar.

// The Buildfile argument was passed? Due to the great number of choices required for LS, this example will cover only a small proportion of the options. Commandlineparser Analysis Methanes are used to analyze the command line arguments. A Boolean option is represented in a command line by the presence of the option, that is, if the option is found, the value of the option will be true, if contrary, the value will be false. We can therefore now disable this and have to either corresponding both debugging option and extracting option. If the -t option is present, the current time is also printed. The second parameter is a Boolean that specifies whether the option requires an argument or not. // Get C value of the STRING COUNTRYCODE = cmd.getOptionValue("C"); IF (CountryCode == null) { // Print Default } // Print Date for Pars Specified by CountryCode Ant will be used here to illustrate how to create the required options. Reason: "+ exp.getMessage ()); } } To see if an option was passed, the HASOPTION is used. The following is the help out for Ant. IF (CMD HASOPTION ("T")) { // Print the date and time } // Print the date } From version 1.5, the defaultPerson constructor now has a replacement with the defaultParser signature (final Boolean AllowPartialMatching) Analyzer CommandLineParser = New DefaultParser (); Commandline cmd = parser.parse (options, args); now we need to check if the option is present. The DateApp utility prints the current date in the standard output The HelpFormatter = New HelpFormatter (); formatter.printlnhelp ("ant", options); when executed, the following exit is produced: ANT - D Use value for certain property -buildfile Use certain buildfile -debug print debugging information No adornments -file Look for buildfile towards the root of the file system and use use esu >elif< elifdliub -renetsil teojorp a sa ssalc fo ecnatsni na dda >emanssalc< reggol- gol rof elif nevig esu >elif< elifgol- stnemnrda tuohitw noitamrofni gniggol ecudorp scame- noitamrofni gniggedub tnirp gubed- esobrev artxe eb eliq-tixo dna noitamrofni noisrev eht tnirp noisrev- noitamrofni pleh teojorp tnirp plehtceojorp- egassem siht tnirp pleh- :snoitpO]...]3tegratf t2egratf tegratf]snoitpof tna });(egasseMteg.pxe + "noitpece detcepxenU"(nltnirp.tudo.metsyS { })pxe noitpece EesraP(hctac) });"ezis-kcolb" (eulaVnoitpOteg.enil(nltnirp.tudo.metsyS ezis-kcolb fo eulav eht tnirp // () "ezis-kcolb"(noitpOsah.enil fi tes neeb sah ezis-kcolb taht etadilav //);sgra ,snoitpof(esrap.resrap = enil eniLdnammoc stnemugra il dnammoc eht esrap // { yrt ; } "01=ezis-kcolb-" { }gnirtS wen = sgra]gnirtS ;)"snmuloc yb seirtn e tsil" ,eslaf "C"(noitpOdda.snoitpO ;)"emitc yb" + tros resiwrehto eman yb tros dna emitc wohs!:" + " htiw]noitamrofni sutats elil fo noitacifidom il" + " (emitc wohs dna yb tros :tl- htiw" ,eslaf "c"(noitpOdda.snoitpO ;)"~ htiw gnidne" + " seirtn e deilpmi tsil ton od" ,eslaf "spukcab-erongit" , "B"(noitpOdda.snoitpO ;)(dliub.)(grAsah.)"skolb etyb-EZIS esu"(csed.)"ezis-kcolb"(tpOgnol.)"EZIS" (redliub.noitpO(noitpOdda.snoitpO ;)"setoacrahc" + "chitparj-non rof sepases lato noitp" ,eslaf "epacese" , "b"(noitpOdda.snoitpO ;). dna .noitamrofni pleh eht sa lilew sa tneatats egasu a etareneg liiw jeurt ,snoourt ,snoourt type, "ina"(pleHtnirp.rettamrof gnillac neht detnirp tneatats egasu a evah ot eriqer osla uoy fi tix dna noitamrofni noisrev eht tnirp noisrev- esobrev artxe eb esobrev- teiq artxe eb teiq- noitamrofni pleh teojorp tnirp- qniggol mroref ot ti hcihw ssalc eht >emanssalc reggol-renetsil teojorp a sa ssalc fo ecnatsni na dda >emanssalc< renetsil- egassem siht tnirp pleh- oEAn odut- .A- zev atsed oriadadrev @A ortemeArap odnuges O ;)"edoc yrtmuc" ,eurt , "c"(noitpOdda.snoitpO noitpO c dda // .resraPluafed a @A adadnemocer a .resraPenilDnammoc ecafretni ad sepA\$Aatnemelpmi sair,Av revah edoP .JoEArdap rop lauta or'Aterid o' sELIF so erbos sepA\$Aamrofni etsil .oE\$Apo a atneserper euq gnirtS gnaLavaj mu @A ortemeArap oriemirp O .odnum od sAap reuglau me aroh a e atad a nimirpmi ed edadicapac a odnecnof .ppAetaD oirjAtilitu o' ednetse ppAetaDlanoitaretini oirjAtilitu O .sretemarap eerht sah dohtem noitpOdda ehtT ;)"emit tnerruc yalpsid" ,eslaf "l"(noitpOdda.snoitpO noitpO t dda // ;)(snoitpO wen = snoitpO snoitpO tcejbo snoitpO taerc // .redliubnoitpO eht gnisu detaerc osla si ti dna ytreporp avaj eht si taerc ot noitpO tsal ehtT ;)(dliub.)"ti esa dna metsyselil eht fo toor" + " eht sdrawot elifdliub rof hcaes"(csed.)(grAsah.)"elif"(emaNgra.)"dnif"(edliub.noitpO = dnif noitpO ;)(dliub.)"elifdliub nevig esu"(csed.)(grAsah.)"elif"(emaNgra.)"elifdliub"(redliub.noitpO = elifdliub noitpO ;)(dliub.)"renetsil teojorp a" + " sa ssalc fo ecnatsni na dda"(csed.)(grAsah.)"emanssalc"(emaNgra.)"renetsil"(redliub.noitpO = renetsil noitpO ;)(dliub.)"gniggol mroref ot ti hcihw ssalc eht"(csed.)(grAsah.)"emanssalc"(emaNgra.)"reggol"(redliub.noitpO = reggol noitpO ;)(dliub.)"gol rof elif nevig esu"(csed.)(grAsah.)"elif"(emaNgra.)"elifgol"(redliub.noitpO = elifgol noitpO .resraPenilDnammoc mu raicr ed aroga somasicerP .noitpOdda sepA\$Apo ed odot@Am o' odnasu odnugesnoc @A otsl .sepA\$Apo sad sotnemugra sod serolav so rarepucer arap sodasu oEAs enilDnammoc od eulaVnoitpOteg sodot@Am so .sl a @A xim* odnum on sadazilitu siam odnamoc ed ahnil ed sepA\$Aacilpa sad amU .raicr ed siec;Af siam sa oEAs sale siop .oE\$Aacilpa a arap sanaelooob sepA\$Apo sa raicr somaV ti esu dna metsyselil eht fo toor eht sdrawot elifdliub rof hcaes >elif< dnif- ytreporp nevig rof eulav esu >eulavytreporp
